

United Water/Suez Environnement North America is a leading provider of water and wastewater services in the United States, through both our owned and operated utilities and our municipal partnerships. Headquartered in Harrington Park, New Jersey, we serve 27 million people in over 40 states through the dedication of 2,600 employees. Our parent company, Suez Environnement, employs 62,000 individuals who provide more than 112 million people around the world with daily access to treated water and environment-friendly waste services.

Our employee culture is built on the key themes of business efficiency, customer service, employee development and managed growth, with a strong commitment to ethics, safety, diversity and environmental stewardship. We strive to provide an environment in which the best talent can grow, develop and be challenged to contribute every day.

We are currently seeking a talented [Operations Manager](#) to join our Wastewater Operations in Jasper, Alberta.

The Operations Manager is responsible for management and oversight of the project including but not limited to; operations, maintenance, laboratory functions, scheduling, budgeting, reporting and for maintaining client relations. The operations manager is to ensure the efficient and safe operation of the WWTP while producing effluent that meets or exceeds the limits set forth in both the client contract and Alberta Environment Approval.

Education/Equivalent:

- High School Diploma or equivalent required
- BS in Environmental Studies or diploma in Water Quality Technology preferred, equivalent experience would be considered
- Excellent knowledge of mechanical and electrical/instrumentation systems
- Previous experience in a similar environment including management duties

Licenses Required:

- Alberta Level IV Wastewater Treatment Operator Certification. Level III certification with the ability to obtain a level IV within 1 year will be considered.
- Valid Driver's License with the ability to meet Risk Management Guidelines

Work Experience Needed:

- 7-10 years experience in Wastewater Environment including progressively more challenging management and supervisory roles.

Special Skills/Abilities Needed:

- Familiarity and adherence to all Alberta Environment Environmental and safety compliance regulations.
- Proficient knowledge of Microsoft Office including Excel, Word, Outlook and PowerPoint.
- Proficient knowledge of SCADA Systems and Computerized Maintenance Management and Laboratory Data Programs
- Must have excellent interpersonal, communication and supervisory skills and be the consummate team player

Compensation:

- Commensurate with experience
- Additional Annual Housing Allowance
- Excellent benefits package
