

October 15, 2019

Charlottetown, PE

WORKSHOP DESCRIPTION:

This one-day workshop is designed to inform attendees of the fundamental aspects of waterborne disease and related issues. Key concepts are developed by addressing the language and scientific approach that allow us to understand the challenges that arise from the analysis and treatment of the water we all rely on every day.

Who Should Attend

This workshop is designed to enhance the knowledge of anyone who has an interest in drinking water quality or is working in the water and wastewater industry. Experienced water/wastewater operators and healthcare providers can benefit from this workshop to reinforce their knowledge and develop greater awareness of the issues.

<i>Outline</i>
Introductions, Housekeeping, Objectives
A Brief History of Water and Wastewater
Overview of Industry Stakeholders, Regulations and Public Expectations
Environmental Hydrology, Water Science, Characteristics and Quality
<i>Coffee</i>
Water Sources, Environmental Stressors, Anthropogenic Impacts on Quality
What makes water a great vehicle for disease?
Micro Flora and Fauna – Basic Classification
<i>Lunch</i>
Types of Pathogens
Impacts of Waterborne Disease
Disinfection
<i>Coffee</i>
Detection Methods
Risk Assessment
Emerging Pathogens
Group Discussion and Wrap-up

PRESENTER:

Lorne Johanson has an educational background in zoology, with a master's degree in environmental science. Lorne has over 25 years of experience in the water/wastewater industry, initially as a manufacturer's representative and district manager and later as an educator and consultant. Lorne has been developing and conducting technical workshops for BCWWA for over 20 years and can be credited with the development of the Chlorine Handler's Course, and various water treatment, distribution and supervisory courses.
