

WATERMAIN SYSTEM DISINFECTION AND SAFEGUARDING

~~October 17, 2019~~

NEW DATE: April 17, 2019

St. John's, NL

WORKSHOP DESCRIPTION:

Course Objectives

This one-day workshop is designed for learners to develop a working knowledge of watermain disinfection principles, flushing, testing and dechlorination procedures related to new watermain installations, upgrades and emergency repairs.

Key concepts are addressed in the context of industry standards geared to facilitate upgrades to the distribution system and new main installation. The procedures dealt with are designed to ensure that installations and upgrading are successfully achieved while safeguarding water quality and the environment.

Who Should Attend

This workshop should be of interest to all who are tasked with distribution system upgrades, new main installation and/or the supervision of such procedures.

Outline:

8:30 - 10:00am	Fundamentals, Water Quality, User Expectations, Standards, Multiple Barrier Approach, System Types
10:00 – 10:15am	Coffee
10:15 – 11:30am	Chlorination; types and applications; Tablet, Slug and Continuous Methods
11:30 – 12:30pm	Lunch on your own
12:30 – 2:00pm	Testing, Inspection, Prevention, Removal, Chlorination/Disinfection
2:00 – 2:15pm	Coffee
2:15 – 4:00pm	Dechlorination, Protection Documentation, Determination, Residual Testing, Final Connection

Provided: Workbook and all reference materials.

Please Bring: A good calculator, writing instrument of choice

COURSE FORMAT:

Every attempt is made to keep the course informal and an enjoyable day-long training experience. Registration starts at 8:00 am, and the instructor will start shortly after 8:30. Wrap-up time is usually around 4:00 pm. Though all workshops are non-smoking, ample breaks are provided for coffee and discussion.

PRESENTER:

Lorne Johanson
